

File API feedback

- `FileReader.readAsBinaryString`
- Restrictions on URL created with `createObjectURL`
- `URL.createObjectURL(object, isReusable)`
 - `isReusable` defaults to `true`
 - `false` means revoke URL after first use
- Blob Protocol version “blob/1.0”
 - How is this tested?
 - Is it ever exposed in the platform?

Saving Blobs

- navigator.msSaveBlob(blob,defaultFileName)
 - Content-Length: <blob.size>
Content-Type: <blob.type>
Content-Disposition: attachment;filename=<defaultName>
X-Download-Options: noopen
- navigator.msSaveOrOpenBlob(blob,defaultFileName)
 - Content-Length: <blob.size>
Content-Type: <blob.type>
Content-Disposition: attachment;filename=<defaultName>

Stream API

- <http://html5labs.com/streamsapi/>
- Stream is a Blob with unknown size
 - Has a content type
 - Can be used with `URL.createObjectURL`
 - XHR `responseType` “stream” in `readyState 3`
- Use cases
 - Previewing media content via XHR
 - Processing data during download
 - Progressive upload of data during generation
